

WHAT'S YOUR MAJOR?

NAME: My

MAJOR: Technical Communication

CLASSIFICATION: Sophomore

TELL THE STORY OF HOW YOU FOUND THIS MAJOR:

I turned to TechComm after switching majors and minors twice. I started out as a Music pre-major and wanted to double major in Music and Computer Science or Journalism. But I met with my advisors to talk about that combination and basically I would have to almost double my classes in order to graduate, instead of just taking double-dips. So Music got pushed down to be my minor, and I was still considering a major (I was not dead-set on becoming a CompSci major) when my sister sent me a link to the TechComm department. I figured that it was an adequate amount of writing compared to the other options, and it sounded fun (Writing Web Content? Researching User Experience? Those are fun things to me). So here I am, a TechComm major!

WHAT TIPS DO YOU HAVE FOR FIRST-YEAR STUDENTS: Remember to always look for double-dips that you can take because that saves both time and money!
