

# WHAT'S YOUR MAJOR?

**NAME:** Katlyn

**MAJOR:** Economics

**CLASSIFICATION:** Sophomore

**TELL THE STORY OF HOW YOU FOUND THIS MAJOR:**

I started off as a Computer Science major, but during my second semester, I realized that it was not the right fit for me. That semester I was also taking a macroeconomics course that was engaging and left me wanting to learn more in the field. It also reminded me of how much I enjoyed taking economics and government in my last year of high school. I chose to change my major to economics because I see a career path there for me, and it is something I could be happy doing.

**WHAT TIPS DO YOU HAVE FOR FIRST-YEAR STUDENTS:**

Don't be afraid to change your mind about your major. You're at college by choice, so if your course of study is leaving you discontent, then find something you enjoy and that you can see yourself doing as a career. We're all still learning about ourselves and our interests, so it's okay if you don't get it right the first time or even the second.
