

WHAT'S YOUR MAJOR?

NAME: Kwin

MAJOR: Sociology

CLASSIFICATION: Junior

TELL THE STORY OF HOW YOU FOUND THIS MAJOR:

I fell in love with my major on a school college readiness trip to a small university called Wayland Baptist University. They introduced us to one of their Psychology professors who made us play those mind games like "in this picture, do you see a bunny or a woman?" and another that was a painting of a forest, but how many times could we see hidden lions camouflaged in. Of course not everyone say those specific things at first and it took some time for their brain to adjust, yet I found these small mind games to be so fascinating and cool. However, I didn't like the fact that Psychology was so science based. So I chose Sociology that focuses on groups of people with a more social interaction perspective. I am excited to continue learning about Sociology to wonder why we feel, think, and interact the way we do. Just as why do some notice things that others don't?

WHAT TIPS DO YOU HAVE FOR FIRST-YEAR STUDENTS:

The first year of college, even the first year can bring lots of stress and an overwhelming feeling. I strongly recommend to take each day at a time. Do not look at things that must be completed or fulfilled this week, month or semester, but only focus on what needs to be done THAT day. Thinking of all the things on your to do list is a headache so take steps (NOT leaps) into getting them done.
