1st Annual NEXUS Cybercrime and Social Behavior Research Conference April 2, 2026 | University of North Texas, Denton, TX

Hosted by the **UNT Department of Sociology** in conjunction w/ **CISO XC**

The University of North Texas, Department of Sociology, and CISO XC invite industry professionals and scholars in the social sciences and related fields to submit abstracts (150-200 words) to the 1st Annual NEXUS Cybercrime and Social Behavior Research Conference. This conference offers a unique opportunity to focus on the social and human aspects of cybercrime and information security, creating a dynamic space for cross-disciplinary dialogue.

Abstract proposals are welcome to investigate all aspects of cybercrime, cybersecurity, and AI with a focus on human and social behavior.

Possible topics include, but are not limited to:

- The general public and the use of cybersecurity techniques
- Social issues in cybersecurity and cybercrime: targeting women, youth, and other marginalized groups
- Mental health, burnout, and stress among CISOs
- Cyber risk and the effects of being a victim of cybercrime (identity theft, stalking, etc.)
- Generational views on cybersecurity prevention techniques
- Cyberterrorism, Radicalization, Hactivism, Cyberbullying, etc.
- International trends and techniques on cybersecurity
- The global digital divide in cybersecurity readiness
- Issues of AI: job displacement, dehumanization, biases, cultural homogenization, privacy, reliance, etc.
- Digital privacy vs. surveillance (national security, corporate tracking and surveillance, etc.)
